

Cut out 9 circles from your paper of choice & fold in half.

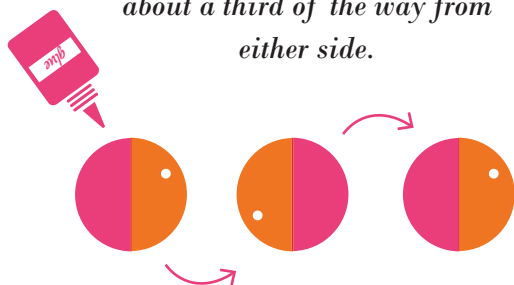

02

Place the circles in a stack and staple them together at the top and bottom of the fold. At this point you can also staple a piece of looped ribbon to hang your bauble.

03

One by one, glue the outer edges of each piece together alternating top and bottom. The glue should be placed about a third of the way from either side.

04

When you're done glueing, your stack of paper will be in the shape of a sphere, all ready for you to get creative.

Don't forget to share your masterpiece #mm_ball
